

Some Terminology to Study for the Wildlife Test

Abiotic vs. Biotic	Rumen
Corridors (for wildlife)	Reticulum
Edge	Omasum
Riparian Buffers	Abomasum
Field Borders	Boone and Crockett Club
Compensatory Mortality vs. Additive	Pope and Young Club
Immigration	Melatonin
Emigration	Epinephrine
Dispersal	Dopamine
Nocturnal	Testosterone
Diurnal	Antlers vs. Horns
Crepuscular	Trophy Deer Management
Circadian	Quality Deer Management
Altricial vs. Precocial	Traditional Deer Management
Imprinting	High Fencing Deer
Mesic vs. Xeric	Deer Contraception, or <i>Fertility Control</i>
Carrying Capacity	<i>Agent</i> in Deer Management
Niche	Bergman's Rule
Biotic Factor	Types of Molts in Birds
Habitat	Point Counts
Pyramid Position	Tape Playback Surveys
Keystone Species	Mist Netting
Anadromous vs. Catadromous	Rocket Netting
Basal Area	Remote Sensing
Prescribed Burning	Venomous Snakes of North America
Forest Thinning	Conservation Agriculture vs.
Mast	Conventional Agriculture
Mast Production (Red Oak vs. White	Game vs. Nongame Wildlife Species
Oak)	
Ruminant	

******The terminology above can be researched via the worldwide web. It is recommended that .edu and .gov websites be used as reputable references.***
